## New Party Emerges **As Chief Opposition** To Chun Regime

By Clyde Haberman New York Times Service
SEOUL — A new party of antigovernment politicians picked up surprisingly strong support and emerged Wednesday from general elections as South Korea's leading

opposition group.

The ruling Democratic Justice
Party of President Chun Doo Hwan retained its majority in the National Assembly, But the most significant result of Tuesday's legislative elections was the success of the New Korea Democratic Party, formed by opposition figures, who only three months ago were banned from political life by Mr. Chun.

[With final results in, Korean news organizations and the head-"marters of various parties said the Democratic Justice Party had won 87 seats in 92, two-seat constituencies, and the New Korean Democratic Party took 50 seats, The As-

member assembly divided on a proportional basis, the ruting party took another 61, giving it a 148-seat total. It won 152 in the last election in 1981. The new opposition gained maining seats were shared by splinter parties and independent

Opposition leaders were jubilant over their surge. They said Wednesday that they would try to form a broad legislative coalition against Mr. Chun's government.

Kim Dae Jung South Korea's leading dissident politician, said that although he is barred from politics he would seek a merger of rival opposition groups into a uni-

fied anti-government camp.

They would operate, he said, under the banner of the New Korea Democratic Party. The new opposition party's

showing created a possibility that the National Assembly, a funda-mentally weak legislature, could become a more vigorous political

turn of Kim Dae Jung to Seoul.

to his house since returning, was not allowed to vote because he is under a suspended sentence for a conviction on sedition charges. Another leading opposition figure, Kim Young Sam, also declined to vote, although he was permitted to

[After the results were announced, Kim Dae Jung hailed the opposition party's success as "a victory for democratic forces." Reuters reported Wednesday from Seoul. "This election clearly reflects the aspirations of our people for democracy," he said.]

Nothing in the voting results significantly affects Mr. Chun's grip on power, which is total and is not due to end until 1988. However, it was the only voter test of any kind before 1988, and the South Korean president hoped it would demonstrate basic support for his leadersociated Press reported from Seoul. ship since he seized control in a [With 92 other seats in the 276-military coup five years ago.

The new opposition party made an especially strong showing in the big cities of Seoul and Pusan, in many cases running ahead of Democratic Justice Party candidates 17 more in the proportional distri-bution for a total of 67. The re-election in one of the more closely election. In one of the more closely watched races, a powerful ruling party official, Lee Jong chan, ran barely ahead of the new party's chairman. Lee Min Woo, in a central Seoul district.

The new party drew its strength largely at the expense of a moreestablished, and many people beheve far more tame, opposition group called the Democratic Korea Party.

It was almost impossible for the governing party to lose under the electoral rules. Two assembly members were selected from each of 92 districts, for a total of 184 seats. With the opposition split, it was unlikely that the Democratic Justice candidate in each district would finish lower than second.

Mr. Chun and his advisers had created the system to all but guar-The election also acquired added antee that they would command about 55 persons or 152 of the interest after the reach-heralded re- about 55 percent, or 152, of the

Vietnamese

ARANYAPRATHET, Thailand - Vietnamese troops reported to total more than 10,000 had advanced Wednesday to within six kilometers (3.5 miles) of Khmer Rouge guerrilla strongholds in mountainous western Cambodia, Thai military officers said.

An estimated 2,000 Vietnamese troops were moving on Pinom Malai from three directions in an atempt to pin the Communist guerrillas into a wedge against the border with Thailand, the officers said. They added that more than 10,000 troops from the 7th, 8th and 59th divisions now surrounded the strongholds of Phnom Malai and

According to the Thai officers, the guernillas began a 12-hour counterattack Tuesday evening is followed an unusually fierce artillery and mortar barrage by the Vietnamese that cleared some Khmer Rouse outposts and forced the guerrillas to disperse onto nearby hilltops. At least 8,000 civilians were reported to have fled into Thailand to escape the fighting.

Casualty reports were not avail-Officers of the Thai eastern border field force, based at the frontier town of Aranyaprathet, estimated that 4,000 guerrillas were defending Phnom Malai, a complex of bases the Khmer Rouge have held since 1981 and successfully defended against previous offensives by the Vietnamese.

The Phnom Malai area is about 32 kilometers south of Aranyaprathet. The Vietnamese objective is to seal off the Phnom Malai headquarters," said a military source, who asked not to be named.

The Vietnamese invaded Cambodia in late 1978. During their three-month offensive this dry season, they have captured camps of another guerrilla group, the Khmer Front. In the past month, the Vietnamese have started attacking the Khmer Rouge, a more formidable opponent fielding as many as 30,000 veteran fighters who are protected by heavily mined, jungled mental protections and protections of the started mental mental

## With Secret Plan To Place N-Arms On Their Soil

U.S. Upset Allies

By Leslie H. Gelb New York Traces Service

WASHINGTON - The United States has contingency plans to deploy nuclear weapons in Canada, Iceland, Bermuda and Puerto Rico, according to Reagan administra-tion officials and a government document outlining the plans.

Recent press reports abroad that such plans exist have caused embarrassment in Washington because U.S. officials had not informed the governments involved. The existence of the plans, some of which have been in effect as long as a decade, was confirmed to the foreign governments only after the reports appeared, Reagan adminis-tration officials said.

Officials stressed in response to inquiries that these were "contingency" plans, that Mr. Reagan had not delegated authority in advance to the Pentagon to deploy the weapons and that, in any event, actual deployment would require approval by the other governments. Nonetheless, the disclosures in

recent weeks in Canada, Iceland, Bermuda and Puerto Rico prompted wide-ranging public debate and criticism, particularly in Canada and (celand.

Administration officials expressed concern that further disclosures would contribute to what they called a growing "nuclear al-lergy" around the world — recently evidenced in New Zealand and Western Europe - to any kind of involvement with nuclear weapons.

Under the contingency plans, the only weapons that would be deployed in the four places are nuclear depth charges called B-57 bombs. Each has about 10 kilotons of explosive power, or the equiva-lent of 10,000 tons of TNT, slightly less than the Hiroshima bomb.

The bombs would be dropped by

P-3 Orion planes or other maritime aircraft to destroy submarines or to block underwater passages for suball year in all four areas for antisubmarine warfare, but technically only on a temporary-duty basis.

The contingency plans were first brought to light in Canada, Ice-land, Bermuda and Puerto Rico when the authorities there were given copies of a document classified top secret and dated 1975 that dealt officials were told that the plans

were still in effect. The plans apparently were distributed by William M. Arkin, a nuclear weapons expert at the Washington-based In-stitute for Policy Studies. A 1975 document entitled "Nu-

clear Weapons Deployment Plan" was made available by Mr. Arkin to The New York Times. The document appeared to be the same as the one distributed abroad, according to Reagan administration officials. The officials expressed strong displeasure about Mr. Arkin's activities and raised the question whether he may have violated laws prohibiting disclosure of such information.

The contingency plans would be put into effect in emergency situations, according to the document but it does not spell out what kind of emergency would trigger a request for deployment.

Contingency plans are drawn up under the nuclear plan drafted anqually by the Joint Chiefs of Staff. The nuclear plan is "coordinated with" - meaning shown to but not approved by - the State Department. It is then sent by the secretary of defense to the president for approval. One part authorizes actudeployments around the world; a second part establishes contingency deployments.

These were once called "conditional" deployments, in which, once the prescribed conditions were met, the military could contact the government involved and, with its approval, deploy the weap-

But administration officials said the authority was no longer delegated in advance for the military to approach the host government; White House authorization would have to be sought by the military if and when an emergency arose.

Officials said that when Canada asked recently if the plans were still in force, a senior Reagan administration official told them that they Robert C. Coates, then the Canadian defense minister, stated in the House of Commons on Jan. 21 that "there are no such plans." Mr. Coates resigned from the Canadian

cabinet this week. With regard to Puerto Rico, a commonwealth under U.S. protec-tion, all nations with nuclear weapwith the possible deployments. The ons, including the United States,

#### Galbraith Derides U.S. Career Diplomats as Timid By John Vinocur New York Times Service portant to be left up to Foreign "there was an immediate tendency partment, that's the way things service officers." among Foreign Service officers not would come out." Mr. Galbraith described the ma-

PARIS - When the U.S. ambassador, Evan G. Galbraith, who has worn his conservative ideology in Socialist France like a top hat and striped pants, leaves his post in July, he will take back home with m about as much discomfort with his own State Department as with French industrial nationalizations or pipeline deals with the Soviet

After announcing this week that he intended to return to the United States -- no successor has been named - the 56-year-old investment banker from Connecticut paused to look back over his four

There was mention of diplomatic goals set and achieved. But what he mainly had to say contained an unusual degree of scorn for the State Department and Foreign Service career officials.

"I have a feeling," said Mr. Galbraith, who was a political appointee, and not a career diplomat, "that the State Department desperately needs to be vigorously harnessed. It has too big a role to play in the formulation of foreign policy, and foreign policy is too im-

Then, plunging into a long-run-ning dispute between State Depart-House political operatives, he contended that the United States was full of competent people - doc-tors, lawyers and businessmen who, if appointed as ambassadors. would serve with more vigor and determination than Foreign Service professionals.

"It's like the line about war being too important to leave up to the generals," Mr. Galbraith continued. "Well, the Foreign Service ofmove up, he has to avoid trouble. He learns in time to have a horror of confrontation.

The result is that the dominant operations are make-work 'cover' operations that are not only useless but mislead people, It's just waves sloshing about without anybody really wanting to do something. There's something about the Foreign Service that takes the guts out of people. The tendency is to avoid confronting an issue."

At the time of the U.S. invasion

to do anything."
"In truth," he said, "it was feared

ment professionals and White by the Foreign Service people that the U.S. had not done the right thing. The day of the invasion, French

television officials proposed that the ambassador debate a leading leftist editor on an evening news was advised by the Foreign

Service types not to go on," Mr. Galbraith said. In retrospect, he looked back at his appearance as an unqualified success. "I was at ficer is like a military person. To the Elysée, doing something the next day" and President François Mitterrand's special adviser "came over and said, 'Hat's off.'

Now, according to Mr. Gal-braith, a number of Foreign Service people persist in regarding President Ronald Reagan's proposal for a space-based defense against nuclear weapons, the Strategic De-fense Initiative, as a bargaining tool for nuclear arms talks with Moscow - and this despite White

House insistence that it is not. "But there is a continual effort in of Grenada in October 1983, Mr. the other direction," he said. "and Galbraith said, as an example, if it were left up to the State De-

jority of Foreign Service people as "liberals," most of whom, he assumes, voted for Walter F. Mondale in the presidential election last "Most of them are conscientious

guys who carry out policy." he asserted. "But there's a difference between carrying it out mechanically, ritualistically, and really pushing the president's policies. There's all the difference in the world." This, he insisted, is the best argu-

ment he can think of in favor of placing political appointees in important ambassadorial posts. "I feel ambassadors should be

out there running an offensive game," Mr. Galbraith said. "The real role in a major embassy is to be an effective spokesman for the president's views. "I got along well with the gov-

ernment here, people who know I don't approve of Socialism," he said. "If there were complaints about me saying negative things about the Communists while they still were in the government. Well, I (Continued on Page 2, Col. 6)

## T-Shirts, Song, Book, Comics Exploit N.Y.'s 'Subway Vigilante'

#### Time-Out Is Ordered in Chess Match

MOSCOW (AP) - The head of the world chess federation ordered a time-out in Wednesday's scheduled 49th game of the championship match, but he refused to confirm rumors that a deal was being sought to end the marathon between the defending champion, Anatoli Karpov, and

the challenger, Gary Kasparov.

Florencio Campomanes, the head of the FIDE, the chess federation, arrived in Moscow amid rumors that aides to Mr. Karpov had approached Mr. Kasparov's team seeking a way to end the match and replay it in September. Mr. Karpov, 33, has not won a game since November and reportedly is near exhaustion. Mr. Kasparov has won three straight games to cut the champion's lead to 5-3.

Asked to explain why he ordered a time-out, Mr. Campomanes replied, "That is my prerogative." He said the 49th game was to be played Friday.

Asked about reports that a way was being sought to end the five-month match, he said: "We have talked of the unusual duration of the match. I said the FIDE regulations are the regulations. Of course, there are always and the regulations of the match. I said the FIDE regulations are the regulations.

VIENNA (AP) - Iraqi planes attacked an Iranian nuclear power plant site with rockets, killing one man and injuring several others, an Iranian Embassy spokesman said Wednesday.

el's withdrawal, to "prevent new The plant at Bushehr was still under construction, the spokesman said. He said the attack took place Tuesday, and at least three rockets hit the plant. He said he had no details on the number of injured or damage to

There was no danger of a nuclear explosion at the site, which had been attacked previously by Iraqi planes March 24, according to a spokesman for the International According to a spokesman for the International Atomic Energy Agency, which has its headquarters in Vienna. He said the Iranians had notified the agency of the latest

#### U.S.-Soviet Talks Reportedly Are Set

WASHINGTON (AP) - The United States and Soviet Union plan to hold talks in Vienna beginning Tuesday on the Arab-Israeli conflict and other issues, a Reagan administration source said Wednesday.

Also on the agenda is the war between Iran and Iraq and the presence of more than 100,000 Soviet troops in Afghanistan, Richard W. Murphy, assistant secretary of state for Near Eastern and South Asian affairs, is expected to head the U.S. delegation.

The talks are part of a Reagan administration effort to work out a better relationship with Moscow, as pledged by the president in a speech at the United Nations in September. Partly to ease Israeli concerns, U.S. officials have emphasized there is no plan to call a conference on the Middle East and give the Soviet Union a major role in seeking an overall

WASHINGTON (AP) - President Ronald Reagan said Wednesday he is optimistic about prospects for a Middle East peace settlement.

Mr. Reagan was asked about a report that King Hussein of Jordan and Yasser Arafat, the chairman of the Palestine Liberation Organization, had reached agreement on "a framework for common action" to deal with the Palestinian problem.

"The little we know about, it seems as if some progress has been made," non, the ministers' statement wel- he said. Mr. Reagan also said his meetings with King Fahd of Sandia withdrawal. Mr. Andreotti said countries and both heads of state." But he said, "We are very definitely that a complete withdrawal from not in support of a great international conference on the Middle East.

#### Bonn Says No Research Offer Made

BONN (AP) — The West German government said Wednesday that it had not been formally invited by the United States to participate in space weapons research.

U.S. Defense Secretary Caspar W. Weinberger said in London on Friday that the United States was attempting to enlist its friends and allies in space weapons research. In Giessen, West Germany, on Monday. Mr. Weinberger said that Washington specifically was interested in assistance from Bonn.

"There is no concrete American offer to the allies on the table," the West German government spokesman, Peter Boenisch, said Wednesday. He was referring to the Strategic Defense Initiative, the U.S. research program that is popularly known as "star wars."

#### **UNESCO** Urged to Dismiss Americans PARIS (Reuters) — The Soviet Union urged UNESCO on Wednesday to stop employing Americans since the United States has withdrawn from

The Soviet delegate, Dmitri V. Ermolenko, told a meeting of the executive board of the United Nations Educational, Scientific and Cultural Organization that the 143 Americans employed by the secretariat should be replaced by people from member nations. He said the United States had automatically lost its right to a quota of UNESCO staff by

leaving the organization at the end of 1984. In a report to the board session, called to debate the financial crisis caused by the U.S. withdrawal, the director-general, Amadou Mahar M'Bow, said that American employees were international civil servants and their jobs were not at risk. New staff members who were not citizens of member states could only be recruited in exceptional circumstances, he

Additional U.S. agents have outspoken cribeen flown into Mexico to help ministration.

### U.S. Drug Agent, Pilot Still Missing in Mexico

Gang Suspected of Abducting Pair; U.S. Ambassador Tightens Security

By Richard J. Meislin

MEXICO CITY -- An agent of the U.S. Drug Enforcement Administration and a Mexican pilot associated with the agency were kidnapped in Guadalajara, Mexico, last week and neither has been U.S. Embassy here.
The agent, Enrique Camarena
Salazar, was kidnapped Thursday,

an embassy spokesman said Tues-day. The pilot, Alfredo Zavala Ave-lar, a friend of Mr. Salazar who flew missions for the agency in Mexico, was abducted a few hours

John Gavin, the U.S. ambassador, said there had been no communication with the men or their

abductors. Mr. Gavin said he had ordered increased protection of American officials and their families in Mexi-

Speaking of Mr. Salazar's abduction, he said: "We have witnesses to this effect: He was taken away in

Guadalajara by armed men. We have not seen him or heard of him The embassy spokesman said that later Thursday, a car in which Mr. Avelar was a passenger was forced off the road as he returned

from the vehicle by two men with machine guns.

The head of the U.S. drug agency, Francis M. Mullen Jr., said Tuesday that he had ordered his agents in the United States to expedite investigations of drug traffick-

Mr. Gavin said the embassy was increasing security measures, "par-ticularly for those individuals, officials and their families who might

with Mexican officials about the kidnappings.

with the investigation, an embassy spokesman said.

Mr. Mullen said that Guadalajara, in the western state of Jalisco, had become "the major center at this time" for what he said were 75 major drug traffickers and 18 major gangs now working in Mexico. He said the Mexican gangs had links with traffickers in South America and the United States.

#### **Union Chiefs** Accused of Breaking Law

WASHINGTON - The presidents of the three largest U.S. federal and postal labor unions will be prosecuted for illegally engaging in political activities on behalf of Walter F. Mondale unless they resign their federal jobs or retire by Feb. 26, according to a government

"We have concluded that during 1983 and 1984 you engaged in campaign activity in support of the presidential candidacy of Democrat Walter Mondale and against the re-election of Republican Ronald Reagan," the Office of Special Counsel, an arm of the Merit System Protection Board, said in letters to the three union officials released Tuesday.

The 1939 Hatch Act prohibits federal workers from campaigning, fund-raising, distributing literature or seeking office.

The three labor officials, Kenneth T. Blaylock of the American Federation of Government Employees, Moe Biller of the American Postal Workers Union and Vincent R. Sombrotto of the National Association of Letter Carriers, whose unions represent 1.3 million employees, have been outspoken critics of the Reagan ad-

## Colonel Asserts Westmoreland Set 'Dishonest' Enemy Ceiling

By M.A. Farber

New York Times Service NEW YORK - A retired U.S. Army colonel who was in charge of estimating enemy strength in South Vietnam in 1967 has testified that General William C. Westmoreland imposed a "dishonest" ceiling on reports of that strength because higher figures were "politically unacceptable.

Colonel Gains B. Hawkins testified Tuesday that the "command position" was that the estimates of enemy strength "would not exceed" 300,000, about 200,000 below the figure supported by the colonel. He appeared in U.S. District Court in Manhattan as the 16th witness for CBS in the general's \$120-million libel suit against the television network.

General Westmoreland, who commanded U.S. forces in Vietnam from 1964 to 1968, denied in his own testimony in November that he had placed a ceiling on estimates of enemy strength. He said he was concerned about the "public relations" impact of releasing new data without "explanation" but was guided by his own views of enemy capabilities and what he believed to be the best intelligence available to him.

Colonel Hawkins, 65, was chief of the "order of battle" section for General Westmoreland's command from February 1966 to Sep-

emy strength figures?

LONDON - The United States has stopped supplying New Zealand with top-level intelligence on the Soviet Union because of the New Zealand government's refusal to allow a U.S. destroyer to make a A. I told him it went back to General Westmoreland himself. Q. Did you discuss with Crile port call, Jane's Defense Weekly

why you believed it went back to The article in the weekly, published Tuesday, quoted "reliable sources" in Canberra, the Austra-A. Because General Westmoreland had established a ceiling, and lian capital.

The reported move would represent the most serious U.S. action against New Zealand, a member of the 1951 defense alliance known as ANZUS, involving Australia, New Zealand and the United States.

In New Zealand on Wednesday, Agence France-Presse quoted war by understating the size and nature of Communist forces, main-ly by deleting the Vietcong's self-defense units from the official list-Prime Minister David Lange as saying that New Zealand had observed "no change" in the flow of routine U.S. intelligence.]

In Washington, several Reagan administration officials declined comment on the Jane's report, saying they were prohibited from discussing intelligence matters. But one official, who insisted on anonymity, said he understood that the administration was "making things tough" for New Zealand in a number of ways.

The report said that New Zea-land was ordered cut from the list of recipients of intercepted radio communications on Feb. 4, when Mr. Lange said for the second time that the destroyer could not dock bide Corp. said Tuesday that by unless Washington guaranteed that April I it hopes to reopen a West the ship was not carrying nuclear Virginia plant that produces meth-weapons. yl isocyanate, the pesticide ingredi-ent that killed more than 2,000 peo-

The intelligence is gathered under a 1947 treaty for monitoring Soviet military and diplomatic radio traffic in the Pacific. Members of the treaty are the United States, Institute, West Virginia, which has Britain, Australia, Canada and New Zealand

Fire Sweeps Manila Hotel, Killing 24 Guests, Staff

MANILA — Fire that spread quickly through one of Manila's luxury hotels early Wednesday killed at least 24 guests and employees, firemen said. Many of the dead were foreigners, according to the authorities.

Sixteen bodies were recovered, and a police corporal, Mario Panganiban, said that firemen had lo-cated eight more. The fire was still burning through parts of the 11-story Regent of Manila Hotel 14 hours after it broke out.

Mr. Panganiban, an arson investigator, said that of the 370 people registered at the hotel, 160 had been transferred to the nearby Hyatt. He said that three were being treated at a nearby bospital.

He said he did not know the whereabouts of the others or how many might have been trapped in

It was the sixth hotel fire in the Philippines in four months. Police blamed three of the previous fires, which killed a total of 40 people, on arsonists, possibly Communist guerrillas, although no group has claimed responsibility for them.

A suspect with alleged rebel ties, escaped last week from police custody. He was being held for trial for an October fire that killed 23 people at the Pines Hotel in the north-

ern city of Baguio.

A group of American guests who work for the Internal Revenue Service said one of their party had

been killed The U.S. Embassy declined to identify any American dead until relatives had been notified.

"I was screaming," said Ann Douglas of Washington, one of 14 IRS officials attending a weeklong meeting at the hotel. "I tried to block the smoke with wet towels and then went running down the

"It was the smoke that was most "There wasn't Valentine's Day deadly," said Colonel Rolando Siquijor, the area police chief.

Fire officials said it could take rire officials said it could take assertal days to determine the cause.

## Publishing Thrives in Poland, But Underground

By Michael T. Kaufman

for a "kolporter" that one might conclude that there is a revivalist cult of the American songwriter publishing houses to have arisen

But the word that sounds like thing clandestine.

lish one, imported from the French, that literally means a door-to-door abroad. salesman, but refers these days to bootleggers of materials published movement.

There are an estimated 20,000 men and women who work as kolporters, taking orders, delivering materials, collecting payments and turning funds over to organizations affiliated with Solidarity.

Judging from the books, maga-zines, leaflets, tapes, cards and badges that they handle, the clan-destine publishing effort is huge. As an industry it is said to involve tens of thousands, and some sources say hundreds of thousands, of mostly part-time volunteers.

In numbers of publications, the illicit press in Poland rivals and may even overwhelm the state-run publishing houses.

A list of underground books recently distributed included such works as translations into Polish of works by Raymond Aron, the French commentator, Milan Kundera, the Czechoslovak writer, and a work titled "Political Psychiatry in the Soviet Union" by Robert van Vooren, a Dutch writer.

Recently, a hard-cover comic book was distributed, a black and white album telling about the rise of Solidarity. A major recent literary event was

of a new novel by Tadeusz Kon-New York Times Service wicki, generally regarded as Po-WARSAW — So many Poles land's most highly esteemed au-spend so much of their time waiting River," was brought out by Krag, one of the dozens of underground during the growth of Solidarity.

In an interview, Mr. Konwicki Cole Porter actually refers to some- said that his last four books appeared first under the imprimatur The word is a perfectly fine Po- of such illicit publishers before being translated and published

"I really don't know how it happens and I don't want to know very underground and connected with much," said the author of such the outlawed Solidarity trade union works as "The Polish Complex" and "A Small Apocalypse."

In Poland, there is an official culture where manuscripts are assigned and then examined for ideological purity, a process that can take anywhere from two years to 25 years, as in the case of "The Uprising of the Polish Nation in 1831." a 150-year-old anti-Russian classic that appeared officially last summer after first being proposed in

But there is an unofficial culture that responds almost instantly to current events.

The police in Poland are efficient and both paper supplies and access to printing equipment are limited. Thus many people have asked how and why this underground culture has been allowed to flourish while the labor unions and political discussion groups that sprouted during the reign of the now-banned Solidarity organization have been

in fact, some kolporters and clandestine editors have been arrested and sentenced to prison terms of up to two years. Still police raids appear to be

perfunctory and there is an impression that some of the authorities the issuing by the nonofficial press are turning a relatively blind eye to

Hathaway was the son of a stage manager and of Jean Hathaway, an actress whose surname he later adopted. He started acting when he was 10, in short one-reel westerns directed by Allan Dwan. His breakthrough high-budget film, released in 1935, was "Lives of a Bengal Lancer," with Gary Cooper and Franchot Tone.

Among his other films were "Home in Indiana." "13 Rue Madeleine," "Call Northside 777,"
"Down to the Sea in Ships," "Four-teen Hours," "Twenty-Three Paces to Baker Street," "The Sons of Ka-tie Elder" and "Nevada Smith." "True Grit," which he directed in 1969, brought John Wayne his only Academy Award.

Soviet Gets a Hill With a View for Embassy in U.S. WASHINGTON — In intelligence circles, the site of the new Soviet Embassy in Washington is considered the biggest givenway since Peter Minuit got Manhattan in 1626 for the equivalent of \$24.

Near the intersection of Wiscon—

Provided new sites for both countries and permitted each country to bring in its own construction crews to work on the interior of its new chanceries, to prevent the installation of electronic cavesdropping devices.

The main reason the Russians

Near the intersection of Wisconsin and Massachusetts Avenues, where upper Georgetown and Glover Park crest at the top of a hill called Mount Alto, 350 feet (100 meters) above we level the site has meters) above sea level, the site has time and U.S. officials were not a commanding view of the entire aware of the site's potential advan-washington area.

The United States and the Soviet In the arcane world of electronic spying, the site is described as an ideal place to monitor government, dollars in trying to intercept each commercial and private communi-\*cations flowing into, out of and over Washington. From an eavesdropping standpoint, that's one of lies, particularly Britain, maintain the most magnificent vantage points in Washington, a senior U.S. intelligence official said.

The Soviet Communications.

The Soviet Union, in turn, operations in Cube

By contrast, intelligence officials say, the new U.S. Embassy in Moscow is being built in the middle of able to monitor almost all domestic the city where surrounding buildcommunications, including teleings will limit the ability to monitor phone and television, relayed to and from the East Coast by satel-How the Soviet Union obtained

the Mount Alto site remains the Electronic spying is considered vital by both countries. One of the subject of considerable debate 16 years after Washington and Mosmost sensitive applications, accow reached agreement on the construction of new embassies. That monitoring the electronic data, teagreement, six years in the making, lemetry, that are transmitted by missiles and re-entry vehicles in

> The tracking of missiles as they fly downrange is carried out by satellites, ground stations and specially-equipped aircraft and ships. This kind of monitoring has played a key role in the ability of both countries to verify compliance with arms agreements.

Soviet eavesdropping in Wash-ington is designed to pluck off any stray unsecured government communications as well as those involving commercial transactions, which are largely unprotected, and even private telephone conversa-tions, intelligence officials say. The United States tries to do the same in Moscow. For a brief period in the 1970s, according to intelligence officials, the United States was able to monitor the radio telephone conversations of Soviet leaders as they drove around Moscow.

The site of the new Soviet Em-

bassy, the officials say, provides a clear line of sight to the State Department, the White House, De-

#### ABU DHABI NATIONAL OIL COMPANY

ADNOC is one of the major oil companies in the Middle East controlling the Exploration, 'Production and Processing of Oil, Gas and Associated Products in Abu Dhabi.

The Company wishes to appoint a number of experienced professionals in its Exploration & Production Directorate as follows:

#### SENIOR GEOLOGIST

Responsible for the preparation of all kinds of sub-surface geological maps on local and regional scales. Prepares evaluation reports on prospective exploratory areas by using all avaliable geological and geophysical data. He should also be able to prepare and evaluate exploration and development programmes and prepare technical reports on the proposed

The candidate should have a B.Sc. in Geology with a minimum of 8 years experience in Petroleum Geology and Log interpretation. Knowledge of Computer applications in Petroleum Geology is preferable.

#### SENIOR GEOPHYSICIST

Responsible for Interpreting seismic information, preparing technical reports and providing recommendations. He will also be responsible for establishing the parameters for field data acquisition (Land and Marine).

The candidate should have a B.Sc. in Geology and Geophysics with a minimum of 8 years experience in the field of seismic prospecting.

#### GEOPHYSICIST

Assists in interpreting seismic results and controlling field data acquisition (Land and

Marine). The candidate should have a B.Sc. in Geology and Geophysics with a minimum of 5 years experience with Companies active in the field of seismic prospecting.

Assists in general surveying and control on surveying jobs conducted by Contractors. He should be able to use modern surveying instruments (theodolites, levelling instruments, etc.), and:

\* Assist in establishing permanent geodetic control in remote areas.

\* Assist in programming and computing triangulation points and general geodetic data. \* Plan well locations and indicate some of old drilled well locations.

The candidate should have High School education and a Diploma in Surveying (at least one year duration) from a recognized institute plus a minimum of 6 years experience with Companies active in the field of oil prospecting.

Good knowledge of English and Arabic is required for these jobs.

These appointments are based in Abu Dhabi city, working on an off-shore concession areas.

ADNOC benefits include a competitive tax-free remuneration, good career prospects, free medical care, free family accommodation, furniture allowance, paid home leave for the family and educational assistance for eligible children.

interested candidates are invited to forward their detailed applications, together with photocopies of their education and experience certificates, within three weeks from the date hereof to:

#### A Middle Way in Nicaragua

President Ronald Reagan has given interviewers from The New York Times a clear, concise statement of his attitude toward the Sandinist rulers of Nicaragua. They betrayed the revolution that Americans cheered for its promise of democracy, he said. They have become pro-Soviet, chased democrats into exile and refused to subject their power to the consent of the Nicaraguan people. The exile army of "contras," therefore, has every reason to fight for democracy. The United States has ample reason to help them.

The president's premises are admirable and accurate. But his attitude is not a policy. Americans are also displeased by betrayals of democracy in South Korea and Haiti, Cuba and Poland, but do not make war on account of such displeasure. Why not?

First, because the costs of exporting democracy by war are usually too high. Even direct invasion of nearby countries would plunge them into endless civil war. We could capture Managua or Havana but we could not clear the hills of the guerrillas thus created.

A second reason is that we are rotten at making intrusive war, overtly or covertly. The Sandinists and Fidel Castro are good examples of how rotten. Their regimes result directly from dictatorships sponsored by America's marines or meddling diplomats. The Central Intelligence Agency's overthrow of pro-Com-munists in Guatemala 30 years ago delivered that country to rightist totalitarians.

A third reason is more abstract but no less compelling. Americans do not want to live in a world where nations feel free to impose their political doctrines on others by force. War should be a last resort, to defend vital national interests. To act otherwise is to stimulate ag-

gression throughout the world. When a president declares war on a country, he needs a better reason than distaste for its regime. Even when he has one, he needs to be sure that his goals are attainable with the force he is prepared to expend. Only with such calculation does an attitude become a policy.

The American-sponsored contra army is simply too weak to overthrow the Sandinists. Its hit-and-run assaults can damage their economy and punish their hostility. But such warfare also invites either unthinkable escalation or the ultimate humiliation of failing to achieve our stated purpose. Meanwhile, the combat cruelly exploits Nicaraguan patriots whose goal we know to be unattainable. In the end, they will be twice betrayed.

Still, surely the contra army hurt the Sandinists enough to make them willing to deal? Perhaps, if the price were clear to them, and tolerable. As the president recognizes, the Sandinists cannot be forced out of power. What they might do under pressure is agree to bar Soviet and Cuban military bases and to let an inter-American force guard against the shipment of arms to El Salvador.

What then of the political, religious and labor freedoms that the president and all Americans want to see in Nicaragua? As in dealing with other countries, these could be made the price of real friendship, of aid and a variety of trade concessions.

The policy choices in Nicaragua are not between blind force and abject acquiescence. Geography and circumstance create an American interest in Nicaragua's future, and opportunities to influence it. Surely judicious pressures for negotiable ends promise a better result than aimless combat. At worst, the Nicaraguan people would be left in a grim peace. At best, they would have America to thank for a gradual improvement in their condition.

- THE NEW YORK TIMES.

#### **Undiplomatic Diplomats**

Look at it from the point of view of our ambassador to South Korea, Richard L. "Dixie" Walker. Or is it Senator Jesse Helms's ambassador to South Korea? Dixie Walker was one of a score of officials who, in a memorable act of diplomatic indiscretion, interrupted their representation of President Ronald Reagan last fall to call for the reelection of the senator from North Carolina.

But never mind. Here was former professor Dixie Walker, in Seoul, faced with the most important assignment of his ambassadorial career: to see to the safe and uneventful return of the political exile, Kim Dae Jung. Given the Korean government's evident fear and loathing of Mr. Kim, and Mr. Kim's popular standing and his escort of several dozen ornery American human-rights activists, it was bound to be a tough assignment. As it happened, moreover, Ambassador Walker blew it. Nobody got badly hurt, but there was a scuffle at the airport and Mr. Kim was taken out of circulation in a way that made Korea look ugly and the United States look foolish. No wonder Ambassador Walker lost his cool.

That, at any rate, is the most charitable explanation for his outburst against the Americans who escorted Mr. Kim home. He said they, or some of them, had "reneged" on the homecoming agreement and provoked the air-port fracas. He did find room to say that the effect was to remove the principal onus from the perpetrators of the violence and place it on

a few Americans who were among its victims. There was no mention of his own contribution, whatever it was, to the collapse of the homecoming accord. All but lost in the shuffle was what good diplomacy would have kept at center stage: the future of Kim Dae Jung and democracy in a state with strong-man rule and plenty of American interests.

In recent days, an intriguing new theme has been heard coming quietly from top American officials. It is time, they say, for the United States to put behind its "Vietnam syndrome," its reluctance to take the hard cases - time to become more vigorous in support of embattled democrats abroad. Surely, there is an implication here for American human rights policy. For to be plausible and persuasive in its call to greater risk-taking abroad in behalf of democracy, the administration must also show its willingness to face up to repressors like the Chun government. As the Korean case demonstrates, however, parts of the administration have their own reluctance. They are full of ardor for the liberation of countries that are in, or falling in, the Soviet orbit - Nicaragua and Afghanistan. If the U.S. government means to ratchet up American support for strengthening the enterprise of freedom, however, the place to build the necessary momentum and credibility is precisely in the countries that are already in the American orbit. South Korea is to do to redeem its policy there?

- THE WASHINGTON POST.

## The Beginning of the End?

The South African government is bargaining with Nelson Mandela, the black South African who has been a political prisoner for 21 years, over the terms of his release. It is a development with historic potential: if the government frees Mr. Mandela, the way will be open for blacks to join whites in an unprecedented search for a political society acceptable to them both. It could mean the beginning of the end of the system of apartheid.

Mr. Mandela is no ordinary prisoner. He is the leader of the outlawed African National Congress, the main black underground group and a likely candidate to become, again, if it is legalized, a major national political organization. He has been in prison longer than most South African blacks have been alive, and he is a legend in his own time. This is due to the principled constancy of his anti-apartheid stand, and to the courage of his wife and, now, his daughter in projecting his voice: he and they have never stopped insisting that, despite the immense personal hardship, he will not accept release unless he is permitted to take up a full political role. His stature both allows him

to drive a hard bargain with the government now, and makes it worth the government's

while to engage him as an interlocutor.

President P.W. Botha at first offered to let Mr. Mandela go, as a private citizen, to a black "homeland." He refused. Then Mr. Botha offered release in return for a pledge to "uncon-ditionally reject violence as a political instru-ment." At the same time, Mr. Botha allowed Mr. Mandela two unusual forums: last month, an interview in a London newspaper and, last

Sunday, a rally addressed by his daughter. It is up to Mr. Botha, an Afrikaner carrying the burden of his people's lonely and insupportable racial inheritance. As he hesitantly opens the door to minimal reform, others seek to pry it open wider. By moving toward a dialogue with blacks he risks shredding his white constituency. He and his fellow Afrikaners, to escape an ever harshening racial confrontation must take a chance on racial partnership. No one can assure them that taking the chance will produce a good result. They can only be assured that there is no alternative. - THE WASHINGTON POST.

#### FROM OUR FEB. 14 PAGES, 75 AND 50 YEARS AGO

1910: A Not So Righteous Treasurer ELSAH, Illinois - Elsah, the "Arcadia of America," where every man, woman and child goes to church; where there are neither doctors nor drug stores, jails nor criminals, and where one who dies before eighty is "cut off in his youth," is stunned. Edward P. Neylon, village treasurer, school trustee, pillar of the church and leader of his people was arrested [on Feb. 1] on a charge of converting to his own use \$650 belonging to the Chicago, Peoria and St. Louis Railroad and \$380 entrusted to him by the unsophisticated citizens of Elsah. Neylon was taken by constables to Jerseyville, where he admitted his guilt. The citizens of Elsah assembled in the church and with bowed heads discussed in whispers the plight of Neylon. No one was able to give a satisfactory explanation

of what he had done with the money taken

from the villagers and the Bluff Line.

1935: U.S. Airship Crashes in Pacific SAN FRANCISCO - The United States Navy lost its second giant airship in two years (on Feb. 12] when the Macon, largest lighter-than-air craft in the world and sister ship to the ill-fated Akron, plunged to its doom in the Pacific 110 miles south of San Francisco while riding out a squall, with a loss of two lives out of a crew of twenty officers and sixty-three men. Admiral Courtney, commander of the battle fleet, said he was convinced that a mysterious explosion — not gas — had caused the stern of the airship to be blown away. Admiral Thomas Seen, commanding the Twelfth Naval District, was inclined to believe that the accident could have been caused by any of a score of things, while Lieutenant Commander Scott Peck, a staff officer aboard the ship, declared a heavy squall had ripped off an upper fin, leaving the airship out of control.

## Tide of Pacifism Puts Pressure on Alliances

N EW YORK — Alliances can and do stand the hard pounding of war. But as events since Feb. 4 have shown, they are susceptible to more insidious pressures.

The ANZUS (Australia, New Zealand. United States) alliance that has flourished since 1951, when the pact was signed, has been seriously weakened in more recent days by discord over nuclear weapons. And NATO, the linchpin of U.S. policy in Europe, suffers from what Europeans consider an overdose of U.S. leadership. and the steady development of anti-NATO and anti-nuclear opinion. Relations with South Korea, the

sole American military outpost on the East Asian mainland, have been strained by Seoul's mishandling and manhandling of the opposition leader, Kim Dae Jung, and his accompanying party upon his return from selfimposed exile in the United States. That incident seems to stress the wisdom of Demosthenes's axiom: "Close alliances with despots are never safe for free states."

Do these incidents foreshadow a breakdown of the alliance system, with all that would entail in the rearrangement of American military deployments? I think not What the incidents do require, however, is more informed diplomatic reporting on the tides of public opinion that influence allied governments. Since April 1952, the ANZUS pact

has been the keystone of U.S. defense in the southwest Pacific. Article 4 says: Each party recognizes that an armed attack in the Pacific area on any of the parties would be dangerous to its own peace and safety and declares that it would act to meet the common danger in accordance with its constitutional processes."

At the same moment when, in light of events of the last several days, American leaders were re-evaluating the willingness of the other two signatories to implement this provision, the U.S. 7th Fleet warned interested countries in the area about Soviet work at Cam Ranh Bay, the old American base in Vietnam. After two years of work, the Russians have rebuilt and expanded the base for the use by their Pacific fleet, headquartered in Vladivostok in Siberia.

Warnings such as these are unlikely to alter the large body of anti-nuclear public opinion in both New Zealand and Australia. The Wellington government, with wide popular support, refuses to allow any American Navy vessel carrying nuclear weapons to enter its territorial waters. Australia has refused to assist in the test of the U.S. MX missile.

ed on the American strategic position by these actions. The long-term question is how far the United States could rely on Australia and New ZeaBy Drew Middleton

land in the event of a serious situation arising in the ANZUS region. even if conventional weapons were the only ones likely to be used.

Would the two governments, goaded by anti-nuclear forces, reject in a time of peril the help of an American carrier, which, almost inevitably, would carry nuclear weapons of some type? On the record of the

reap a dividend of anti-Americanism. Halfway around the world the twin viruses of anti-nuclearism and pacifism evident "down under" are affecting the North Atlantic Treaty Organization, which must be considered

the most important U.S. alliance. Lord Carrington, who presides over NATO's political organization. recently pointed out one reason why last week, it seems likely. This senti- anti-nuclear and pacifist groups ment contrasts with the welcome the flourish in alliance countries. Young two countries gave American troops, and middle-aged Europeans, he not-

'If you catch cold, don't blame me.'

ships and planes early in 1942, when the Japanese were on the march. President Ronald Reagan emerged from his talks with Prime Minister

Bob Hawke of Australia proclaiming that the ANZUS alliance "is very sound and very solid." This is the comment of an invincible optimist on an international situation that worries even the mildly pessimistic.

Yet, American pressure on New

ed, find it difficult to take the alliance seriously, because they did not experience World War II or the first desperate years of the Cold War that included the Berlin blockade.

They simply see the long years of peace." Lord Carrington said. "and then ask whether NATO is really necessary, despite the fact that NATO has guaranteed that peace."

Other elements also contribute to and such pressure would probably nuclear warfare, and that repels the

millions who are understandably frightened of such warfare.

Such people are, naturally, targets for Soviet propaganda fed through cover organizations like the World Federation of Trade Unions. Sheer cost also saps NATO support. The economies of NATO Eu-

rope cannot now support the increases in defense expenditure to which past governments agreed. To do so inevitably would cut into funds earmarked for welfare and provide the growing anti-NATO, anti-nuclear forces with more ammunition. Finally, of course, there is the Rea-

gan administration's Strategic Defense Initiative, commonly called "star wars." NATO opposition to SDI rests on three main points: One, it will not work, or, if it does, it will cover the United States and not

Europe. U.S. spokesmen have told NATO that SDI will protect Europe from the Soviet SS-20 missiles now aimed at it as much as it will protect America from the SS-19s. Two, the American investment in

SDI will be so huge that it will starve U.S. and allied forces of the conventional weapons needed to meet a Russian invasion of Western Europe. Three, the United States is plung-

ing into the program without taking into account that the Soviet Union is likely to respond by building more land- and sea-based intercontinental ballistic missiles than SDI could shoot down, thus increasing the dan-ger of a Soviet preemptive strike.

Governments in NATO Europe, on the whole, support the alliance. But NATO is made up of democra-cies where the tide of anti-nuclear and anti-NATO sentiment is rising. General Bernard Rogers, the supreme allied commander in Europe,

is extremely concerned with this tide. He pointed out recently that serious people, and not just fanatics, increasingly think in terms of pacifism, neutralism and accommodation with the East. It is the entrance of such people into the anti-NATO, anti-nuclear group that makes the movement so dangerous to governments dependent on popular support.

Is there a way out? General Rogers thinks that showing aerial photographs from U.S. spy satellites to the European public would do much good These show Soviet and Warsaw Pact military moves that can only be interpreted as having offensive aims.

The photos conceivably might answer those Europeans who doubt the value of the alliance and those Americans who urge the withdrawal of U.S. forces from Europe. Unfortunately, the Reagan administration believes the use of these photos would give the Soviets information about U.S. spying capacity - infor-€ 1985 Drew Middleton.

Why U.S. Aid to Rebels in Nicaragua Must Stop WASHINGTON — President Ronald Reagan's State of the Union address presented an image of Nicaragua that does not correspond

to the real situation there. The Sandinist dictatorship of full Cuban, Soviet-bloc support, not only persecutes its people, the church, and denies a free press, but arms and provides bases for Communist terrorists attacking neighboring states. Support for freedom lighters is self-defense, and totally consistent

with the OAS and UN charters." There is only one terrorism in Nicaragua: the criminal actions of the "contra" mercenary forces, who every day murder innocent civilians, including mothers and their children. For that reason, the government of Nicaragua has armed its people as a legitimate defense against an aggression that is promoted and supported from outside its national territory.

The assertion that assistance to the mercenaries is a form of self-defense is a complete distortion of this principle as defined in Article 51 of the UN charter. Any honest application of this article to the problem that exists between Nicaragua and the United

in the foreseeable future.

is identical with Angola's.

The central problem is and will remain the military aggression against Nicaragua and the lack of a negotiated peace. The miracle is that in November Nicaragua did hold free elections, observed as such by many international witnesses. The Latin American Studies Association of the United States sent a team of observers who concluded that "no party was prevented from carrying out an active campaign" and "the opposition could, and did, get its message out." The aggression against Nicaragua

explains why temporary restrictions on certain civil liberties, including press freedom, have been imposed by my government. This has been done reluctantly and as a direct response to the war that the CIA and its contras have been waging against us.

No restrictions on these civil liberties were imposed by my government during its first two and a half years that is, before the CIA war began in December 1981. The restrictions were not established until March 1982, when the war took on major proportions. Press censorship and other restrictions were lifted during the elections. The opposition campaigns, including Arturo José Cruz's unofficial one, received full and prominent press coverage.

If the U.S. government and the CIA really want to see democracy flourish in Nicaragua, let them stop supporting the war against us. Numerous delegations from all over the world have visited Nicaragua, including representatives of Amnesty International, Americas Watch

and the National Council of Churches. None of those delegations has found any evidence of persecution of the Nicaraguan people or the church by the government. In fact, they have stated categorically that no such persecution exists. Honesty leads to productive nego-

tiations. That is the spirit that underlies Nicaragua's participation in the Contadora peace initiative and the bilateral talks that America suspended in Manzanillo, Mexico. A similar approach by America would help remove the threat of a regional war and create the conditions for peaceful relations between our two countries. Newsday.

## Rethinking **Mideast Arms Sales**

By Mel Levine

W ASHINGTON — The Reagan administration had alarman use this week's visit by King Fahd of Saudi Arabia to put the final touches on an arms deal. Those plans were changed, apparently in reaction to a negative response in Congress.

Physical Action 500

The administration has decided to postpone any arms-sale decisions pending the results of an assessment of the regional security situation in the Middle East. While that is a wise step for the administration to take the idea of an arms sale at this time should not even have arisen.

Supporters of arms sales to Arab nations argue that such sales are in the interest of U.S. national security because they further our goals in the region, help induce Arab countries to join the peace process and are an instrument of leverage that the administration can use to moderate and affect Arab foreign policy. In 1981 the administration, after a

heated and protracted debate, sold five Airborne Warning and Control Systems (AWACS) radar planes and other arms to Saudi Arabia. President Ronald Reagan assured Con-gress that the Saudis would provide substantial assistance" to the United States in promoting Middle East peace. In addition, the president said that he would cancel the sale if "the " Saudis adopt policies which are disruptive to prospects for stability of the region and detrimental to U.S. national interests."

Since then the Saudis have:

 Continued to oppose Camp Da-vid, central to U.S. peace policy. · Continued to finance the Palestine Liberation Organization, whose main aim is the destruction of Israel. Continued to boycott Egypt and

work to ensure its isolation. Threatened King Hussein of

Jordan with economic sanctions if he negotiates with Israel.

• Refused to use its leverage with Syria to persuade it to leave Lebanon. Continued to subsidize massive Soviet arms purchases for Damascus. • Tried to offer Oman a deal to induce cancellation of a strategically important base accord with America.

Clearly the sale of the AWACS has failed on all counts to further U.S. & goals in the area or to induce Sandi Arabia to join the peace process. It has compromised, not enhanced, our interests in the region. If the past is any indication, there is little reason to think that new arms sales will gain the United States anything new.

Unfortunately, the administration views arms transfers as an indispensable component of its foreign policy. In the absence of a coherent, consistent Middle East policy the administration has increasingly substituted arms sales for diplomacy. Instead of encouraging legitimate parties to negotiate with each other, it has opted for trying to exert its influence by controlling the arms flow. Thus the "freedom fighters" are in fact rem- sale of arms is the Reagan adminisclusive goal of peace in the region.

Instead, we should return to the principles that have guided our Middle East policy in the past. To help protect our own national security interests we must again ask how our decisions affect both regional stability and the security of Israel, the only democracy and our strongest and most dependable ally in the region.

Arms sales to Arab nations would exacerbate Israel's severe economic problems, which are created in large part by its heavy defense burden. And if arms sales are made to Arab countries at this crucial time for Israel, it would be forced to continue to divert an even more significant share of its fragile budget to defense.

That undermines our own policy and interests in the Middle East: We profess to be committed to Israel's security, but at the same time we undermine that security with burdensome arms sales to Arab nations. Before the administration consid-

ers further arms sales to Saudi Arabia 🐉 or to any other country in the Middle East, for that matter - it needs to rethink its approach to the fundamental problems in the region. Fawning over Saudi Arabia has got us no closer to resolving complex and vitally important Mideast questions,

nor has it brought peace any closer.
This administration must learn that a weapons sale is not a policy. It must ask in what way U.S. arms sales to Saudi Arabia, or any other country, would help to achieve a solution to the problem in the region. The Saudi arms sale is a bad idea because it substitutes a fragmentary action for an overall policy. Before the United States considers any further sales it must develop a comprehensive policy with clear goals and reasonable, constructive means to achieve them. It has a long way to go.

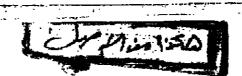

The writer is a Democratic Con-gressman from California and a mem-ber of the House Foreign Affairs Committee. He contributed this comment to the Los Angeles Times.

#### LETTER

**Toward Nuclear Sanity?** 

To use nuclear weapons would be an act of suicide. No nation could use them without bringing on its own destruction and that of civilization 25 we know it. This single indisputable fact is reason enough to congratulate New Zealand on its refusal to allow nuclear armed warships to enter its harbors. The action deserves the thanks of us all, as an exemplary, and therefore important, step toward sanity in the affairs of mankind. Let us hope it will encourage other governments, East and West, to display similar conviction and strength of purpose in facing up to the economic and other bullying tactics of superpowers.

PALO ALTO, California (NYT) — As an item of diet, water is vital and has no calories. But a physician at Stanford University reports that too much water intake can be dangerous to people who have epilepsy. A weight-loss organization that boasts more than 650 centers has published a booklet advocating the drinking of eight to 12 eight-onnee. (about a quarter of a liter) glasses of water a day, according to Dr. James C. White of Stanford University's School of Medicine.

He said that in a recent five-month period he has seen three patients with previously well-controlled epilepsy who had grand mal seizures. All three were following the diet. Excessive water intake is one of the oldest mechanisms known to induce seizures, Dr. White said.

Silkworms Join War Against Cancer TOKYO (Reuters) — Japanese scientists are working on getting the silkworm to produce the protein interferon, a prime candidate for a

Dailchi Seiyaku, a Japanese drug company, has introduced a new biotechnology method using silkworms to produce alpha-interferon ap-parently identical to that in humans. Alpha-interferon is one of several

forms of the protein which is produced naturally in human cells as a

detense mechanism against infection.

The Japanese process relies on a virus that commonly attacks the silkworm and infects its cells, Dr. Mitsurn Furusawa of Daiichi Sciyaku said. Once in a cell, the virus naturally produces large amounts of protein within the silkworm. "It's still basic research," Dr. Furusawa said, "but by isolating the part of the virus gene that controls the protein production and replacing it with the human gene that makes interferon, interferon may be produced instead."

Scientists Work on Horse Fever Test

WASHINGTON (AP) — Potomac horse fever, a disease responsible for the deaths of many valuable horses in the eastern United States, is showing up in other areas of the country even as scientists who recently isolated the suspected cause work to develop a test for early diagnosis of

the malady.

Researchers at the University of Illinois at Champaign-Urbana isolated a blood-borne parasitic organism that is believed to be transmitted to horses by ticks. The organism is a rickettala, a type of germ that evolutionally is placed between viruses and bacteria, which resides inside

The horse fever rickettsia inhabits and kills white blood cells called monocytes, which are part of the animal's defense system against infection, the researchers reported.

#### SCIENCE

#### Scientists in Peru Reconstruct The Murder of Pizarro in 1541

By William D. Montalbano

Las Angeles Times Service

Link—The pugnacious life and
bloody death of Francisco Pizarro are well documented. The Toxic shock syndrome is caused by poisons produced by the staphylo-coccus aureus bacteria, which enter the bloodstream and result in a lever, diarrhea, a rash, red eyes and peeling fingertips. It is fatal in one case out mystery did not begin until after his assassination, but it endured for four centuries.

of 100.

Dr. James K. Todd, director of the infectious disease section of Children's Hospital, said Tuesday that while toxic shock continues to strike menstruating women, "It is clear that it wasn't a tampon disease. It is the infection that is critical. It appears that the organism, under the condition of menstruation, and perhaps under the confines of a tampon or anything else, could be important. We haven't worked out the details."

The took havened the analysis and perhaps to Rely. Now, scientific detectives say they have finally solved The Case of the Conquistador's Bones. Unmasking an impostor mum-In 1980, however, the syndrome was linked by some researchers to Rely super absorbant tampons, manufactured by the Procter & Gamble Co., which were taken off the market. The company settled out of court with several hundred women who sued after developing toxic shock syndrome my along the way, the investigators say they have positively identified Pizarro's remains, enabling them to reconstruct a 444-year-old murder

#### WALL STREET WATCH

#### The Wave of the Future: Super Bear or Super Bull?

By EDWARD ROHRBACH

OBERT R. Prechter Jr. says in his Elliott Wave Theorist that stocks are enjoying a super bull market in which the Dow-Jones average will soar above 3,000 by 1987. Donald J. Hoppe, in his own market-advisory letter that uses the same Elliott wave theory, contends that stocks are gripped in a super bear market that will plunge the Dow below 600, perhaps 500, within the same period.

Asked to explain the discrepancy, Mr. Hoppe replied: "One of

us is going to be wrong."

So far, it looks as if Mr. Hoppe is the one who has been reading his charts — or "waves" of stock-market averages the theory traces — upside down.

However, Joseph Granville, whose own market timing has been noteworthy in the past year, declared this week that he differs with Elliott wave "super bull" projections for Wall Street in the late 1980s. He maintains that he has dis-

theory: 'One of us is going to be wrong." covered that an early practi-tioner of the theory let his ruler slip and mis-measured one of the waves. Correcting for the error, Mr. Granville adds, indicates that the super-cycle wave is cresting now in 1985, and long-term bulls

On reading the charts

of the Elliott wave

like Mr. Prechter "may look right for a few months ... but the end could come anytime."

"A blow-off rise to any series of new highs would simply exacerbate the decline that follows," he asserts. "In other words,

the bigger the top, the bigger the flop." Mr. Prechier, however, is riding an amazingly accurate prediction himself. After Wall Street opened the year with three straight declining sessions, pushing the Dow down to 1,182, he wrote Jan. 7 from Gainesville, Georgia, to his subscribers: "The sideways correction in the stock market should end this week as the 23week cycle bottoms. Wave [3] should then carry the market to new all-time highs in a surge of record volume and super

The profile he sees for the market in February is up to a midmonth peak, then down for the second two weeks to a low around Feb. 28, "providing the first minor correction of the year."

HIS "third wave" which has lifted Wall Street out of the doldrums, Mr. Prechter said, is the phase during which investors find "new reasons" to buy stocks as fundamen-

tals improve almost daily.

Francis H.M. Kelly, chairman of the investment-policy committee at Oppenheimer & Co., maintains the reason for the stock market's surge has not been "the perception of something dramatically new about to occur, but something dramatically old which had been largely ignored." He refers to the decline in shortterm interest rates.

"Ironically, the stock-market advance began after the huge decline in short rates was completed," he said. "With so much money created in the face of weak growth inches." loan demand, the equity market found its perfect excuse."

What is wrong with Wall Street now after its "breathless advance" in January, he said, is the "highest level of cuphoria since 1978." Markets embarking on sustained advances "usually climb the proverbial wall of worry, which keeps popular optimism in check," he added. "The 1985 market has moved from opening pessimism to suphoria without this intervening phase of skepticism."

In the next month or two, he predicts an "intermission" on Wall Street "in which individual equities or laggard groups will prosper, but the almost random gains are behind us."

Oppenheimer, noting that oil-service stocks have been the second worst-performing group in the market in the past 30 weeks, believes this "market rotation" will focus on them. Rec-(Continued on Page 11, Col. 2)

#### Retail Sales Rise In U.S.

Autos Contribute To 0.7% Growth

The Associated Press WASHINGTON -- Retail sales, held back by record cold weather in much of the United States, still managed an increase of 0.7 percent in January despite sharp declines at department and clothing stores, the

government reported Wednesday.
The U.S. Commerce Department said sales climbed to a seasonally adjusted total of \$110.7 billion last month after a 0.5-percent drop in December.

Much of the gain was attributed to a strong increase in auto sales. which rose 4 percent in January. It was the fourth month in the past five in which auto sales have advanced. Auto saks in January were 7.1 percent higher than a year ago.

But sales at clothing stores dropped 5.1 percent in January, the biggest decline since October 1967. Sales at larger department stores were also off 5 percent. The report said both declines may have been caused by "the record cold during the month.

Commerce Secretary Malcolm Baldrige, in a statement issued atter the report on retail sales, said consumer purchases are on an upward trend that should support continuing growth in domestic pro-duction and help create new jobs.

The weakness at apparel and department stores contributed to a 0.2-percent decline in sales of all nondurable goods, which are items not expected to last at least three years. Sales of durable goods, led by the

surge in auto purchases, were up 2.5 percent in January over the December level.

Sales of building materials rose 1.1 percent in January, and sales at furniture and home-furnishing stores were up 0.4 percent in January, and 10.4 percent above sales a

year ago.
In the nondurable category, sales at grocery stores were up 3 percent and service stations posted a 1.1percent rise. However, sales at restaurants and bars dropped 1.2 per-

The 0.7-percent overall gain was in line with expectations. Most private analysts were looking for a recovery after disappointing De-

#### The New Face, New Style of Atari

#### **Tramiel Turns** His Talents to A Comeback

By Andrew Pollack New York Times Service SUNNYVALE, California

When Atari Corp. opened its booth at last month's Consumer Electronics Show in Las Vegas, its refreshments -- champagne and hot dogs — were more of a message than a meal. "A champagne party on a hot-dog budget." one executive billed it — and the message was clear. Jack Tramiel, a man with a cost-cut-ter's eye and a showman's flair,

was back in business. Pizzazz and penny-pinching have long been Mr. Tramiel's trademarks. In an industry known for its California technowhiz kids. Tramiel, 56, has turned his mix of hustle, hard-nosed bargaining and aggressiveness into an art.

It served him well in the 25 years during which he built Commodore International from a Bronx typewriter repair shop into a leader in the home-computer market. And now, a year after he resigned from Commodore in a dispute with its chairman and largest shareholder, he is putting his style to the test again, this time at Atari.

In his drive to revive the company that he belped crush during his days at Commodore, he is trying to prove that his success there was not a fluke, and, some suggest, to get back at his old

In his younger days, he sur-vived a major Canadian financial scandal and the calculator wars of the 1970s that almost drove Commodore to bankruptcy. But

Communications last July, could be his greatest business chal-

The guy's got to be another Lee lacocca to pull this off," said a former Atari executive who

scoffs at that likelihood. Mr. Tramiel, however, is off to a fast start. He has enlisted his three sons and drawn upon much of his personal fortune to get the venture under way. He has pared expenses by dismissing most Atari employees and trying to cancel previous contracts. Just before the crucial Christmas selling season, he slashed the price of the Atari 800XL computer, from \$180 to \$120, catching Commodore napping and pro-

some believe that saving Atari, which he bought from Warner In January, the company introduced new computers that promise to be extremely powerful and inexpensive — and if Mr. Tramiel has his way, lucrative: He hopes they will bring Atari's revenues to \$1 billion in 1985, turning a profit for the company and pulling it out of the red ink that has engulfed it for the past two years. He is already talking about

building an assembly plant in Nevada and of buying a semiconductor company to give Atari the vertical integration that was a major reason for Commodore's SUCCESS.

Now, regardless of what they think of Mr. Tramiel personally,

## China to Permit **Buying on Credit To Boost Sales**

BELING — For the first time since the Communist takeover in 1949, the Chinese government plans to permit credit sales to encourage turnover of consumer goods, the official China Daily re-ported Wednesday.

Installment buying was once common in pre-revolutionary Chi-na and many people became heavi-

But Mao Zedong gave low priority to the consumer sector and credit sales for major items were unknown. Some shookeepers, however, have extended small amounts of credit to regular customers.

As part of current leader Deng Xiaoping's drive to invigorate the Chinese economy by using market forces, the consumer and service industries are being promoted energetically.

The government announced Sunday that it had leased nearly 70,000 state-run enterprises to individuals or collectives in an effort to make them profitable, and revealed that it was "experimenting" with a plan to sell state-owned businesses

The English-language China Daily quoted a report by the Ministry of Commerce that said the government now wants to tap China's record bank savings to spur con-sumption, and therefore produc-

China's one billion people kept an average of 117 yuan (\$42) in the bank last year, a record total of 121.47 billion yuan (\$43 billion). "More flexible ways of selling

goods will be adopted, such as al-

lowing sales on credit or by installment payments and encouraging advance orders for durable goods including color television sets, re-frigerators, washing machines, cameras and motorcycles," the re-Since January, customers in ma-

jor cities have been able to order color televisions and other durable goods by paying cash six months in advance.

Catering, repair shops, tourist at-tractions, beauty parlors, gymnasi-ums and other recreational facilities also will be expanded to generate more consumer spending, said the report.
However, Prime Minister Zhao

Ziyang said China will allow private businesses to flourish as part of its "capitalist component" but will never allow them to control the nation's economy, the official Communist Party newspaper Ren-min Ribao reported Wednesday.

"China is not going to adopt any policies to nationalize its individually owned economy or private businesses," Mr. Zhao told a Bel-gian business delegation Tuesday, according to Renmin Ribao.

The development of private business, to some extent, is conducive to our national economy." Mr. Mr. Zhao said that while he anticipates an expansion of privately owned businesses during the next few years, the Chinese economy would remain predominantly un-der state or collective ownership.

He said rather than resorting to nationalization, the state would use taxation policies to restrict inordi-(AP, UPI)

## **Dollar Climbs Despite Rumors of Intervention**

LONDON — The dollar continbounced back, and in late aftermade in this market if you've got the guts to go long dollars, he said.

The dollar continbounced back, and in late aftermade in this market if you've got the guts to go long dollars, he said.
The dollar continment Wednesday on rumors that the United States was selling dollars on foreign-exchange markets ued to set record highs against Eu-ropean currencies Wednesday in nervous and often active trading.

The upward march continued despite some dealers' reports of limited central-bank intervention Tuesday night in Japan and Wednesday in West Germany.

Israel Hikes Departure Tax JERUSALEM — A parliamentary committee Wednesday approved a government request to raise the tax that Israelis pay to leave the country to \$150 dollars from \$100 dollars, committee officials said. The new rate takes effect Sunday, Another sovernment pro-Sunday. Another government pro-posal to impose a 20-percent levy

on air tickets still needs parliamen-

tary approval.

Pratt, Samsung to Form Aerospace Company

WEST PALM BEACH, Florida — United Technologies Corp. said Wednesday that its Pratt & Whitwednesday that its Fratt & Whit-ney's government-products divi-sion agreed with Samsung Preci-sion Industries Co., South Korea, to establish a joint company, Unit-ed Aerospace, which will be based in Korea. crease in all the major activities of the international financial-services in Korea.

It said the company will over-haul and repair Pratt & Whitney F100 engines, which power U.S. Air Force F-15 Eagle and F-16 Falcon aircraft.

China Trebles Tourist Areas

BEJJING — China is trebling the number of cities and rural counties that foreigners can visit without special police permits and opening 87 new areas to tourists with permits, the Foreign Ministry said Wednesday. now more than 100 ordinary members and 14 voting members, Mr. said Wednesday.

**BUSINESS ROUNDUP** 

#### Atlas Copco's Earnings Rose 144% Last Year

By Juris Kaza STOCKHOLM — Atlas Copco AB, the Swedish air-compression, mining and tool group, reported Wednesday that its 1984 pretax earnings amounted to 573 million kronor (562.1 million) in 1984, a 144-percent increase over the 1983 figure of 235 million kronor.

In a preliminary report, Atlas Copco's management said it was proposing raising the 1984 divind to 4.50 kronor from 3 kronor in 1983. Last year, the company cut its dividend from 6 kronor in 1982.

Atlas Copco's 1984 sales rose 12 percent to 9.1 billion kronor, from 8.093 billion kronor in 1983. Sales outside Sweden accounted for 92 percent of the total.

Looking to 1985, the company said it expected a continuing improvement in sales. Ian Jacobson, an analyst at E.B. Savory Milln in London, said 1984 results meant that his forecast of 1985 earnings of 750 million kronor was "conserva-

ropean customers in 1985. The volume of orders was virtually unchanged in 1984.

Europe accounts for about 50 percent of Atlas Copco's total busi-

Mr. Wachtmeister also noted weak growth in the volume of orders in Australia, South Africa and Canada, three major markets for mining equipment. "There will be volume growth there in 1985 and a return to an acceptable profit level." he said

Mr. Wachtmeister said that some of the strongest order growth was in North America, where the United States is Atlas Copco's largest market, and in Asia. North American orders totaled 1.313 billion kronor, and were up 25 percent in volume terms. Asian orders amounted to 882 million kronor, ир 30 percent.

The rise in Asia largely reflected 200 million kronor in order bookings from China, Mr. Wachtmeister said, adding that they would be recorded as sales and would bring profits in 1985 and afterward. The orders from China also represented Wachtmeister, said he expected an an important breakthrough in that

#### Continental Told To Stop Buying Air Micronesia

United Press Intern HOUSTON - A U.S. bankruptey judge has ordered Conti-nental Airlines to stop buying stock in Air Micronesia and has halted litigation between the carriers in court in Saipan.

Attorneys for both airlines said Tuesday that the action by U.S. Bankruptcy Judge Glover Roberts signaled that he wanted the parties to negotiate an out-of-court settlement. Judge Roberts last year gave

Continental the go-ahead for a \$2.5-million plan to buy shares of United Micronesian Development Association, which owns 60 percent of Air Micro-nesia. Continental owns 30 percent of the carrier, which has services from Hawaii to Guam, Manila, Saipan and Tokyo.

A group of UMDA share-holders lought Continental's takeover attempt by filing a class-action suit in Saipan. Saipan is part of the Marianas, a Trust Territory of the Pacific Islands, which is administered by the United States.

Hong Kong's Excelsior Hotel No Longer for Sale By Dinah Lee International Herald Tribune
HONG KONG — Hongkong Land Co. has withdrawn one of the

group's major assets, the Excelsion Hotel, from the property market because offers did not meet the company's criteria for sale. David Davies, Land's managing director and chairman of the

group's hotels subsidiary, had said that Hongkong Land was aiming for a sale price of about 800 million Hong Kong dollars (\$100 million) for the 951-room hotel, when the Excelsiot was first offered last Oc-He said Wednesday that after Hongkong Land's sale Jan. 22 of its

ria for the Excelsion had sharpened. Sources said that the cash relief provided by the sale of Hongkong

A second spokesman for Land said Wednesday, "The sale of Electric reduced our group borrowing requirement by some 20 percent.

Electric pushed the desired price

closer to 900 million to I billion

the end of last year at 14.7 billion. more than 6 billion dollars to meet Now our borrowing requirement stands at around 11.8 billion. In short, the sale of Electric enabled debts incurred during Hong Kong's property boom in the late us to not sell the Excelsior. Sudden

ly we were not a forced seller of the desired price is not a reflection of the local property market, be-cause the hotel sector is booming." he added. "In fact, the Excelsior is a cash cow generating operating cash flow net of tax of 75 million

dollars this year."
Micahel Hollington, a partner at controlling stake in the leading local utility company, Hongkong Electric Holdings Ltd., to the rival property and trading group, Hutchison Whampoa Ltd., for 2.9 billion dollars, the "disposal criteria for the Excelsion to what the Excelsion to with the Excelsion the Excelsion to with the Excelsion mented on the decision to with-draw the Excelsion from the market: "We've just carried out a study on hotels in Hong Kong. We estimated that the average take-up in 1984 was just under 85 percent and that in 1985, this will increase to 89 percent. If these figures are correct, it is going to place upward pressure on hotel room rates, and thus it would seem prudent to hold on to a hotel investment."

The Excelsior had an occupancy rate of about 90 percent in 1984. As the largest property company

#### COMPANY NOTES

Porsche Reports Profit Rose AMAX Inc., the mining group based in Greenwich, Connecticut, said it has found a gold deposit in northwestern Nevada that can equipping its models with catalytic probably be mined at low cost. 21st March, 1985 has been determined as the Exchange Date (as defined in the Trust Deed). Persons entitled to delivery of any of the Notes are accordingly advised to obtain from the specified office of any of the Paying Agents, the office of Cedel S.A. in Luxembourg or the office of Morgan Guaranty Trust Company of New York

In accordance with the Trust Deed dated 10th as operator of the Euro-clear System ("Euro-clear") certificate(s) to be completed stating that such Notes are beneficially owned by persons (a) who are not U.S. persons (as defined in the Trust Deed) or (b) who are U.S. bank branches (as defined in the Trust Deed) or sophisticated institutional investors in the United States. Completed certificates should be delivered to the office of Cedel S.A. in Luxembourg, or to the office of Euro-clear in Brussels for forwarding to Cedel S.A., within the 15 days prior to, on or after the Exchange Date. Definitive Notes with Coupons will be available on and after the Exchange Date in exchange for such certificates.

February 1985

Representative Office in London.

U.S. Reports Fewer Visitors From Abroad

By Lee A. Daniels
New York Times Service

NEW YORK — The strong dollar, which is fueling an explosive growth in foreign travel by Amerigrowin in foreign traver by Ameri-cans, helped cause the number of foreign visitors to the United States to decline in 1984 for the third consecutive year, according to federal tourism officials.

The drop last year amounted to 4 percent, or about 900,000 tourists. It further widened the difference between money spent abroad by Americans and money spent in this country by foreign tourists.

Because American travel to Europe increased last year, the tourist dollar gap is expected to show a significant increase, when the figures are in. The deficit was \$5.4 billion in 1983, up from \$3.4 billion

Yet, while the United States Travel and Tourism Administra-tion this week was trying to enlist the private sector, states and local governments in a campaign to lure more tourists to America, the Of-fice of Management and Budget was proposing that the agency be dismantled. The agency's current budget is \$12 million.

Administrations have tried to regiminate the office since it was created in 1961. But Congress, mindful of tourism's importance to many states and cities, has always supported the agency and is expected to do so again this year.

Senator Daniel K. Inouye, a Democrat of Hawaii, a state that depends heavily on tourism, said: "Many of us can't understand why it's so difficult for the administration to read numbers. Tourism is one of the top three money-makers for 40 states, and if it weren't for tourism, our trade imbalance would be much worse."

The United States trade deficit reached \$123 billion last year, near-ly double the figure for 1983.

they affected the parent company's results too severely.

In 1984, with a handful of excep-

in 1984, with a handful of excep-tions, all the companies that made game and educational software for those machines lost money and some have gone out of business. Retailers are going back to selling televisions and video-cassette re-

The changing market might be too much even for Mr. Tramiel to contend with. Consumers are moving toward more expensive and more powerful machines selling for \$1,000 or so, the domain of IBM and Apple — a price range that Atari plans to undercut with its new machines while offering similar power. Both larger companies have far greater resources than Atari and machines that have tons

The doubters do not alarm Mr. Tramiel. "I'm used to that kind of talk," he said, noting that Wall Street always doubted him when he was with "the old company."

He also said that revenge is not a

In early July, after an all-night negotiating session with Warner, Mr. Tramiel agreed to buy Atari for \$240 million in promissory notes. He hopped on a plane and arrived at Atari headquarters in California the same morning, a Monday. By Wednesday, virtually the entire marketing and sales staffs, several hundred in all, were gone.

Warner Communications, which came into the business in the late 1970s, was so hurt by the downturn that it virtually gave Atari away to Mr. Tramiel last summer, trying to rid itself of the problems before they affected the parent company's results too severely.

In 1984 with a handful of exception ways sell it. If you buy wrong, even with a whole army you will not be able to sell it."

#### THE TRUE CONFESSIONS OF AN ALBINO TERRORIST

By Breyten Breytenbach. 396 pp. \$18.95. Farrar Straus Giroux, 19 Union Square West,

New York, N. Y. 10003. Reviewed by John Gross

T HE South African poet and painter Brey-ten Breytenbach, who is widely regarded as the foremost Afrikaans poet of his generation. went into self-imposed exile in 1960 and settled in France. Five years later he returned to South Africa for a short visit, traveling on a forged passport. His mission was twofold - to recruit a pair of trade unionists to help promote the nascent black unions in South Africa from an office in Europe, and to discuss future policy with underground members of Okhela, a group of white militants, dedicated to the overthrow of the apartheid regime, which he had helped to found with some fellow exiles in 1972.

From the outset, however, he was shadowed by the security police, who arrested him at the airport just as he was boarding a plane to return to Paris. Charged with terrorist activities, he was sentenced to nine years' imprisonment, and spent nearly two years in complete isolation in the maximum-security prison in Pretoria (known to its inmates as "Beverly Hills").

While he was in prison he managed to write the semi-fictional pieces subsequently pub-lished under the title "Mouroir," but on his release he still felt impelled to write a more direct account of his experiences. The language he used was English, having decided that it suits his present sense of his literary role better than Afrikaans.

Much of the book's force nonetheless comes from Breytenbach's knowledge of Afrikaans culture. He understands intimately what it is he is rejecting, and his indictment has the edge of a family quarrel —literally so, in some ways, since his family was, and is, deeply committed to the existing system. Not long before his arrest, when he slipped into a cinema to get away from someone he thought might be tailing him, he had the eerie experience of finding himself watching a documentary about his eldest brother, who is commander of the country's crack anti-guerrilla unit. Another brother, a reporter, he describes as having "decidedly fascist sympathies."

Given the ordeal it chronicles, "The Confessions of an Albino Terrorist" could hardly fail to make a powerful impression, but it displays considerable artistry as well. The writing is sharp, restless, often raspingly sarcastic; a little

mannered here and there, perhaps, but no matter - Breytenbach succeeds brilliantly in depicting the horror and squalor and nearmadness (and sometimes the sheer madness) of the prison world into which he was thrust.

A world where cement floors have to be polished until they shine like mirrors — but he manages to convey its tedium without growing tedious himself. A world where life goes on in the midst of death, where a prisoner who is due to be executed in a few days' time can start weeping and screaming because he has been given the wrong books instead of the Louis 'Amour westerns he asked for.

The jailers and security men Breytenbach describes furnish him with an unforgettable gallery of grotesques. There is the swaggering interrogator whom he nicknamed (with a nod to Ian Fleming, and to the language of Afri-kaans insult) "Jiems Kont": the fanatical Master Basie, "the big boss of the prison shrinks"; Major Schorff with his scissors and "his hogshead of angry purple blood," snipping the extra words off letters from prisoners' families that exceeded the permitted length, by however little, and flying into a rage if he thought a prisoner showed signs of behaving like a "misier," a self-respecting human being, rather than a "bandiet."

And how is the system to be brought to an end - the prison system, and the wider evil of apartheid that it exists to serve? Ultimately, Breytenbach believes, majority rule is inevitable; but if he is a long-term optimist he is a short-term pessimist, and a medium-term pessimist, too. He cannot see the whites in South Africa voluntarily yielding ground, or the Western powers using their leverage to force them to; at the same time he has come to regard the African National Congress as free and democratic only "in the double-speak, Orwellian sense," and he does not think there is any chance of it transforming itself. A bleak prospect, if he is right — though I should add that some of his political arguments strike me as rather muddled. What he does do, however, is to show us the current South African regime for what it is, and to leave us without any excuse for averting our eyes.

John Gross is on the staff of The staff of The

## Dresdner Raises Dividend by 25%

FRANKFURT - Dresdner Bank AG, West Germany's second-largest commercial bank, reported Wednesday a 25-percent in-crease in its dividend to 7.50 Deutsche marks (\$2.29) a share from 6 DM, and also announced a one-for-seven rights issue priced at 155 DM a share.

an increase the previous year from 4 DM, was larger than expected, industry sources said. Dresdner said it would raise 465 million DM through its rights issue

and, through allocating more than 300 million DM of that amount to reserves, will be in a better position to meet new capital-ratio regula-

most valuable player.

would come to this."

Thus the National Hockey

Mario Lemieux, the 19-year-old

okie of the Pittsburgh Penguins

"Before I came into the league,"

said Lemieux, "all I thought was Gretzky, what it would be like to

play against him. I never thought it

goal near the end of the second

period; then, after the Campbell

team drew to within 4-3 midway

through the third on Gretzky's only

goal of the night, he scored again.

"Kids like him are the future of

the league," said Gretzky, who is

Dot the only star, but it seemed that

the Wales team's other main con-

tributors revolved around him. Ray

Bourque, a Boston defenseman, sei

an all-star record by assisting on four goals, including both of Le-mieux's. New Jersey's Kirk Muller,

also 19, had an assist on Lemieux's

first tally. For the Campbell team,

Edmonton's Mike Krusheinyski

And there were sentimental he-

ros. New York Ranger Anders

Hedberg, playing in his first all-star game in what he has said will be his

ast season, had a goal; and Marcel

Dionne, the league's third leading

scorer, tallied for the Campbells. It

was the Los Angeles forward's goal

But with all of those compelling

personalities, the game was largely

lacking in dramatics — until

Gretzky appeared in front of the

Wales Conference Scores 6-4 NHL All-Star Triumph bringing the Campbell stars to within 5-4. Then Gretzky, seeking a final chance, roamed behind Lind-CALGARY, Alberta - Wayne Gretzky with his arms raised in the air is how most everyone expected

Tuesday evening to end, and that's just about how it did end. There it Gretzky came out in front on the left side of the crease; standing about three feet from the goal, he took a pass from Winnipeg's Dale Hawerchuk and fired toward a was, 26 seconds to go and Gretzky thought he had scored the tying goal — but the puck got caught somewhere beneath goalie Pelle half-open net.

But a sprawling Lindbergh got just enough of the puck to keep it out, and Gretzky had to lower his

"I knew he was around the back of the net," said Lindbergh, "But then I lost him. Somebody hit me had two goals and an assist, and the then I lost him. Somebody hit me Wales Conference scored a 6-4 vic- and I fell in the net — I didn't tory over the Campbell Conference really know where the puck was. I in the NHL's 37th all-star game. tried to butterfly as much as possi-Lemieux was named the game's ble to cover the net."

Said Gretzky: "I thought it was in. I had the whole net right there." Midway through the second period, Gretzky had lifted the puck from Washington defenseman Scott Stevens and skated in on a breakawy — which Lindbergh thwarted.

"That was nice, to come back and make that save." Lindbergh said. "I said before the game that whatever happens, happens, I was nervous, but not like last time." "Last time" was the 1983 all-star game, when Gretzky scored four

third-period goals against Lind-

Edmonton goalie Andy Moog and Philadelphia's Tim Kerr raising it to 2-0 at 5:31 by tucking the puck

between Moog and the post.
The Campbell team halved the margin 62 seconds later when Dionne drilled a 25-foot slapshot that hit defenseman Mike Ramsey and got past his Buffalo teammate Tom Barrasso, who was in the net. Toronto's Miroslav Frycer tied the score on a 25-foot wrist shot that went through Barrasso's legs at 16:55.

3-on-2 break. Goalies Moog and Barrasso ex-

Krushelayski started the play off

scored with 2:51 remaining to play. Goaltender Pelle Lindbergh, right, receiving congratulations from former nemesis Wayne Gretzky.

-- Moog by Grant Fuhr and Barrasso by Lindbergh.
The Wales team quickly took a 4-2 advantage, on goals from Hedberg at 13:46 and Lemieux at 17:47.

Hedberg, at 33 the oldest player in the game, broke down the mid-die of the ice and was about 10 feet from Fuhr when Lemieux, skating down the left lane, put a pinpoint Dass on his stick.

On the prettiest play of the night, showing rare coordination between players on an all-star squad, Bourque skated down the left side and passed cross-ice to Muller, who put it back into the middle to Lemieux
— who beat Fuhr with a low wrist

The late tension lasted until there were nine seconds remaining and Mike Gartner from Washington scored into an empty net.

Lemieux was second-youngest player on the ice, after linemate Muller, who is 18. Pittsburgh, New Jersey and the Rangers are involved in the only real playoff fight at the moment, but Lemieux said that he, Muller and Hedberg did not discuss the race before Tuesday's game.

"We just talked about what we had to do," Lemieux said. "I was nervous and I didn't know what to expect in my first all-star game, but Ray Bourque told me just to go out there and play and it would be all right.

"It's a big seeling to win the MVP when you play against Gretzky and you play with Mike Bossy. You expect those guys to win it. You can't really explain the feeling. Maybe tomorrow I'll understand what happened on the

Lemieux also said of the award: "That was for him." He was referring to Don Cherry, the former Boston coach and now a television broadcaster, who recently called Lemieux "the biggest floater in hockey."

"It's his opinion, but you can't say he's right. The Penguins asked me to play offense," said Lemieux, who has 22 goals and 45 assists in 38 games for Pittsburgh. "They don't care about my defensive play." (NYT, WP, UPI)

#### Storm Clouds on Baseball Horizon

WASHINGTON -- Put a billion dollars on the table and it gets people's attention. Put it up for grabs and you never know what will happen. Maybe even baseball strike.

Yes, it's that time again. Spring training starts next week. Opening Day is just 53 mornings

And the Basic Agreement's run out. Just what we all wanted Nothing makes your day like

studying the negotiations be-tween a union whose employees make an average of \$330,000 a year and a group of owners whose clubs are worth \$30 million to \$60 million or more. Nothing prompts your sympa-

thy like wondering how these simple folk will divvy up that billion dollars, which arrived in the six-year network television deals that Bowie Kuhn, the former commissioner, left as a lega-

The good news in 1985 is that, on both sides of the table, baseball has its best available minds — and sanest temperaments working on the problem.

Owner's man Lee MacPhail is

mild and conciliatory compared to Ray Grebey, who was hired specifically as a tough guy in 1981. Union representative Don Febr is as smart and tart as his mentor, Marvin Miller, but doesn't carry the deep personal bruises that the owners inflicted on Miller.

A wild-card player is the new commissioner. Peter Ueberroth, who says he'll keep his hands off. But last time push came to shove, he served as an arbitrator in the ampire's strike in October.

"I'm not going to tell you that everything is hunky-dory," said Fehr of the union. "But there is an absence of the kind of hostility that marked other negotiations. That makes it more likely we'll find our way our of this

The bad news -- and unfortunately the only substantive news
— is that little, if any, progress has been made.

In fact, because of injudicious words and acts by two owners, John McMullen of Houston and Peter O'Malley of Los Angeles, everything's behind schedule. More on that later. Both MacPhail and Febr had

hoped for a new agreement be-fore spring training. Now, it seems unlikely that a deal can be the key issue. That's where the struck by Opening Day. "I don't want to make artifi-

Fehr. "I don't care whether we we have to fight."

war of 1981. worry. Two old familiar key is-

Most important is that billion. Since the 1960s, the players have received one-third of baseball's network TV money for their pension plan. "Where that

we get it done in March, April or May.... We always have time to fight if we have to fight.'

"The owners claim it was just

In its last TV contract, base-

The players are saying, "We'll take our usual third of that -\$55 million a year." Owners say, "No you won't. You got \$15 million a year under the last Basic Agreement and that's the start-

ing point for any new talks."
"We want one-third. We expect it. And, in the end, I think

Underneath their mandatory outward optimism, both Mac-Phail and Febr are starting to sues and one nagging new prob-lem are at the conflict's core.

'I don't care whether

one-third figure came from, no one knows," MacPhail said. The two sides have argued about it for 15 years and finally

agreed to disagree.
The players say that one-third of any new TV revenue is automatically theirs. The owners' answer is, 'That's ridiculous.' The owners feel that their only obligation is to produce a firstrate pension plan. They don't think this one-third exists."

a series of 'coincidences' that in each new contract we always got one-third," Fehr said. "We say one-third was what we negotiated for and they can't take it back

ball hit a bonanza, quadrupling its income from the networks — \$1 billion for six years through

we'll get it." Fehr said. "If they insist on backing off one-third, it's a guaranteed confrontation. The only way we'll come off

June is probably the player's give it to them and win. But mouth of choice if they decide to strike, just as it was in the 60-day want war. We want solutions both sides can live with. The issue that makes owners

almost comparably upset is salary arbitration.

"The clubs feel whipsawed between free agency and arbitra-tion," MacPhail said. "If a rich big-city team gives a player a million dollars a year, then a player from a poor small-town team can go to arbitration and get his case decided, in part, on the salary standards set by the

big spenders. "The owners know they can't climinate or emascriate arbitra-tion," said MacPhail. "But we want to see more than procedur-

al changes." "In salary arbitration, the two sides are going in opposite direc-tions." Fehr said. "I hope they aren't serious about some of their ideas because if they are, then down the road, that has a lot of problems attatched to it."

One reason so little progress has been made on these two big issues, let alone a dozen others, is that McMullen and O'Malley made serious missteps.

Both are members of a fourman committee of owners who are supposed to be the innermost circle of the club's negotiating team. Yet both have embarrassed MacPhail and needlessly stirred up the union.

McMullen popped off about how much money baseball was losing. That necessitated an eggin-the-face letter to Fehr reiterating that management was not claiming any financial hardships in its arguments. O'Malley included drug-test-

ing clauses in the contracts of some young Dodger players; that, according to Fehr, upset "an unbelievable number of players." MacPhail has since had to reiterate that drug-testing is not an active issue in the contract

"If that stuff with McMullen and O'Malley was just craziness, that would be one thing," Fehr said. "But it makes you wonder, Who is it Lee talks for?

"If two owners on Lee's committee can't get their signals straight, that creates an enormous problem. If you're negotiating with someone who doesn't have authority, you can never turn your hole cards over.

"I know what (the union's money is. It's like Willie Sutton membership will really take in a and the bank. You find them crunch. Our team has the flexibility to make decisions. Does "I hope there aren't people [in Lee really know what his owners get it done in March, April or ownership] expecting contronta-want and what they'll settle for? May, just as long as it gets done. tion, because that tends to be a We always have time to fight if self-fulfilling prophecy," Fehr up at night worrying, you're self-fulfilling prophecy," Fehr up at night worrying you're said. "If they insist on it, we'll wrong."

## British Track to Stiffen Drug Testing

LONDON - The British Amateur Athletic Board hopes to put into place a strict anti-drug policy that would call for random tests for

are currently subject to year-round testing, but checks in track and field have been restricted to competitive events. That meant athletes who used drugs out of season or in tory drug test. Some of the coun-prize money. training could theoretically avoid try's federations require drug test-

detection. Under the new policy, British championships, but U.S. athletes athletes who wanted to compete know when the blood samples will internationally, including at Olymbraships, and by whom.

We didn't execute "If they do not sign, then they approval of our executive committed to represent Brittee, which is higher than finance, so board tribunal that will decide to represent Brittee, which is higher than finance, so board tribunal that will decide board tribunal that will decide

whether to impose a ban.
In a statement, the board said: "We have led British sport in the testing for prohibitive drugs over the last 10 years.

For some time, the BAAB has been considering random sampling at any time of the year and has been pleased to note that both the Brit-ish Olympic Association and the Minister for Sport [Nigel MacFarlane] have joined us in seeking a broader scheme for the random sampling of sports persons."

Last month, The Sunday Times

quoted a leading track and field administrator, Paul Dickenson, as saying that up to 60 percent of Britain's international-class athletes had used drugs. Dickenson, chairman of the International Athletes Club and a

former Olympic hammer thrower, later accused the newspaper of mis-representation. "All I said was that I believed that 60 percent of the full range of international athletics events was likely to include some competitors who had taken drugs."

The same article quoted numer Sebastian Coe, who won gold and silver medals at the Los Angeles Olympics, as saying drug abuse in sport was "a problem which all the sophisticated countries of the world suffer from, including Brit-

## A Time of Good Feeling

WASHINGTON — The secret wanted to proceed with the MX missile and 'Star Wars'? Did you larity is that he has the ability to make us all feel good, when we know we should feel bad.

Last week's State of the Union speech was another triumph for the

I have no idea how it played in Peoria, but from what I could tell it well in Washing-

ton. "What did you think of the president's speech?" I asked a secretary in my building. "I thought it was wonderful," she said. "He

Buchwald leveled with the American people. "When did he do that?" "When he asked the lady cadet from West Point to take a bow from the balcony."

You felt that was the highlight of his address?" I inquired. That and when he asked the lady from Harlem to also take a bow, because of what she had done

for little babies." "Yes, but what about the fact that the president glossed over the budget deficit and indicated that he

#### **Burma Displays** 33-Ton Jade Rock United Press International

RANGOON - A 33-ton jade rock, reputed to be the world's biggest, is on display Ran-goon's 10-day Union Day exhibi-

Discovered in July 1982 in the jade-producing area of Karmaing in the northern Burmese state of Kachin, the giant stone was brought uncut to Rangoon by road and rail under heavy guard in January, 1983.

Estimated to be worth several million dollars, the boulder of jade sits majestically in the Mining Ministry's pavilion. It could pass as a common rock but for a few patches of emerald green showing through where the surface crust has been scraped off. The exhibition will run until Feb. 20.

have any feelings on that?" "Not really. I just thought Nancy looked beautiful in her red dress."

A young man working as an intern on my floor said, "I thought it was a good speech and it was about time someone came out for the poor people and the farmers and the urban centers and deregulation of the airlines and the Peace

Then you didn't get the impression that the president was avoiding the issue of how he expected to reduce the budget deficit without raising taxes?"

"Frankly, I wasn't listening that closely. All I know is what he told us. The country's in excellent shape now, and it's going to get even better if Congress passes all of Mr. Reagan's programs."
"That's a big 'if."

"Well, they sang Happy Birthday to him."
"Was there anything about the speech you didn't like?"

"I was very annoyed when George Bush and Tip O'Neill kept talking while the president was speaking. They shouldn't have

"Perhaps they weren't paying attention because the president had given the same speech before." I

suggested.
"It doesn't matter if they heard it before. They should have pretended they didn't."

My third survey victim told me the thing she liked about the speech was the president's tie.

"Is there anything else you re-member about it besides the president's tie?

"Forget the president's speech for a moment. What did you think of the Democratic reply?

"No," she said. "Was I supposed

"What reply?" "They put on their own reply to the president's State of the Union

"I didn't hear it. I was watching 'Dynasty.' "Don't tell me you'd rather watch 'Dynasty' than hear the Democrats defend their party." She said in disbelief, "Now

## Tom Clancy, a Double Agent of Sorts

By Peter Masley

Washington Past Service

ALTIMORE — Thomas L. Clancy Jr.,

37, who uses the sobriquet "Tom Clancy," started writing "The Hunt for Red October" in July, 1982 "from the beginning. not knowing how it was going to end. It really was a lot more fun doing that way. If you plan things ahead of time you lose spontaneity. He created a story based on the attempted defection to Sweden in 1975 of a Soviet destroyer crew (IHT, Feb. 8). From that event, and a few others, Clancy crafted a fast-paced, strongly plotted and technically solid account of a half-Lithuanian "sub driver" defecting to the West with the Red October, the Soviet Union's newest, stealthiest and most powerful nuclear missile submarine.

"I knew I could look up the facts," Clancy says. "What I didn't know was what kind of people go to sea in ships that are designed to sink." He found out by interviewing submari-

ners and technical experts.
Since publication by the Naval Institute
Press in Annapolis last October, "The Hunt for Red October" has had four press runs and has hit the best-seller lists. The Naval Institute Press is preparing a fifth edition of

25,000 copies. Because "Red October" has sold 45,000 copies, publishing experts call it a stunning success. (Most first novels by unknown writers sell 3,500 to 5,000 copies.) Considering the additional barriers Clancy faced - no literary agent, and a nonfiction publisher that had never before produced a novel and lacked the sales and distribution machinery of the New York houses - "Red October" also could be called a breakthrough.

Word of mouth and more than a dozen reviews, some enthusiastic, propelled sales. Paperback rights went to Berkley Publishing Group for \$49,500 and United Kingdom rights went for around \$15,000. The Naval Institute Press has sold foreign language rights for Dutch, West German, Japanese and South American editions.

"We don't have any pretensions that this is great literature," says Naval Institute Press marketing director Jim Sutton. "It is just a hell of a good read."

Clancy works as an insurance broker in Owings, Maryland. "When did you last have a policy with us?" he asks a caller. "What is your name? How old are you?"

Clancy and his wife, Wanda, who operate

the agency, have 1,000 clients in Southern Maryland. "When you're your own boss," Clancy says, "you can budget your time." If writing

weren't fun, Clancy says, "I wouldn't do it. I don't need the money. This business supports me rather well." Among Clancy's insurance clients are peo-

Clancy: "I handle technology well."

former Navy nuclear engineers who operate the Baltimore Gas & Electric Co.'s Calvert Cliffs Nuclear Power Station on Chesapeake Bay, 20 miles (32 kilometers) south of his insurance agency. Clancy mined them for technical information about the nuclear and naval aspects of "Red October."

Clancy is well read in his genre of thriller novels. He says Frederick Forsyth "is, at his best, probably the best in the business. Richard Cox, he hasn't done much work but what I've seen I really like. Jack Higgins, at his best, he's awfully, awfully good. A. J. Quinnell [a pseudonym], the new guy, nobody even knows who he is. There's a number of good writers out there; fortunately or unfortunately, most of them are Brits and I figured it's about time an American did it."

The central character and hero of "The Hunt for Red October" is CIA analyst and historian Jack Ryan, Ryan, a clean-cut allple he calls "nucs" - pronounced "nukes" - American, "started to take form in the late

1970s," Clancy says. "In most any thriller fiction, the hero is an unmarried guy in his 30s who likes to drink and smoke and run around. What's wrong with a hero who's married, loves his wife and plays with his kids? That's what most people are," says

Like Clancy, Ryan was born in Baltimore, but here creator and createe diverge.

Clancy, who got an English degree at Loy-ola College in Baltimore, had returned to his alma mater to give a lecture. Ryan, Clancy explains, "got a degree at Boston College in economics and went into the Marine Corps, was injured and retired on a medical discharge. Along the way he was accredited as a CPA, went to work for a stock brokerage firm, made himself a lot of money, married a doctor, an eyecutter - Kathy Ryan is an ophthalmic surgeon - and then he decided he was just going to leave the brokerage business and got himself a doctorate in history and through a circuitous route he found himself being invited to join the CIA."
There is no room, in Jack Ryan's world, for

doubters and second guessers. Ryan himself is a self-assured man of mental and physical action. Jack Ryan's activist CIA, in contrast with portrayals by some other espionage writers, is not immobilized by fear of Soviet moles. It's the reverse: Ryan's CIA runs the United States's mole in the Kremlin.

When America deals with other parts of the world," Clancy says, "we should concern ourselves less with what we're against as opposed to what we're for. Too often, conservatives, you always hear what they're against and there's a reverse side to that. We are for freedom, we are for justice, and the reason that we and the Communists can't get along is that they are not for freedom and they are not for justice. They are the negative guys and we are not."

For his next work. Clancy has teamed up with a naval analyst. Larry Bond, to write a book tentatively called "Sunset." "It has a naval subject matter and it's quite

a bit more complicated than 'Red October.' Clancy says. His plans after "Sunset" call for three more Jack Ryan thrillers. The first of them is called "Patriot Games," Clancy says, and deals with terrorism and the period of Rvan's life that preceded the events in "Red October." Clancy may have been an untested novelist when he wrote "Red October." but he still had the good sense to lay the groundwork for a sequel. "I'm not that good a writer." he says

"Maybe I will be some day but that day is not yet in sight. I do a good action scene. I handle technology well. I like to think that I do a fair - fairer - job of representing the kind of people we have in the Navy, portraying them the way they really are. Beyond that, I'll try to listen to my critics and improve what needs

S. base at landed from Paris. Two station McMurdo sound 1,550 miles wagons whisked the chef and his (about 2,500 kilometers) from the confection from the airport to the

Composer Yiannis Xenakis's

"Polytope," a spectacular music and laser-beam show that was to open Athens's six months as cultural capital of the European Commu-nity, has been canceled, the Greek culture ministry announced Wednesday. The Paris-based Greek composer had proposed a giant 60-minute spectacle that could be seen and heard all over Athens, with fireworks, laser beams and electronic music. Last month, Xenakis went to Athens to seek the Greek armed forces' cooperation in providing helicopters and warships to take part in the show. He said the multi-media sound and light show, culminating with the release of hundreds of carrier pigeons, would be "a festival of peace." But the plan ran into vociferous opposition from archaeologists who feared the city's ancient monu-ments could be damaged by the "Polytope." Xenakis has successfully staged "polytopes" elsewhere in Greece and in France, Canada and Iran. The American composer Richard Adler, known for his Broadway musicals "The Pajama Game" and "Damn Yankees," has written a symphonic work in honor of the Statue of Liberty's 100th birthday in 1986,

The suite will previewed March 9 at Salt Lake City by the Mormon Tabernacle Choir and receive its world premiere at Lincoln Center in New York on April 11.
